Safety 1st and Beatrix Potter “Designer 22”

Date of recall: May 20, 2002

The recalled seats were manufactured by Dorel Juvenile Group between January 3, 2002 and February 13, 2002.

Only model numbers and color codes 02-621-SAL, 02-620-AZY, and 02-620BEA are included in this recall. The model number and date of manufacture are located on the instruction and warning label on the side of the car seat/carrier.

The seats were sold from January 2002 through April 2002 for between $40 and $70 each. None of these seats were sold in Canada.

Reason for the recall:
- The plastic handle can unexpectedly release, causing an unrestrained infant to fall to the ground and suffer injuries.
- There have been 4 reports of the handle releasing.

What should you do?
- Stop using the seat as a carrier (it’s okay to use as a car seat).
- Contact Dorel Juvenile Group (800-207-8182) for a free repair kit.

Arriva and Turnabout by Cosco

Date of recall: June 25, 2003

These seats were sold under the Cosco Arriva and Turnabout brand names and manufactured by Dorel Juvenile Group. They have the following model numbers:

<table>
<thead>
<tr>
<th>Arriva</th>
<th>Turnabout</th>
</tr>
</thead>
<tbody>
<tr>
<td>02-665</td>
<td>02-753</td>
</tr>
<tr>
<td>02-729</td>
<td>02-756</td>
</tr>
<tr>
<td>02-733</td>
<td>02-758</td>
</tr>
<tr>
<td>02-755</td>
<td>02-755</td>
</tr>
</tbody>
</table>

You can find the model number and manufacture date on the instruction and warning label on the side of the carrier. The seats were made on or before January 31, 2000.

The car seats were sold from September 1997 through December 2000 for between $30 and $60 alone or $90 to $140 when sold with strollers. They are no longer available to purchase.

Reason for the recall:
The plastic handle locks can unexpectedly break or release while using the seat as a carrier, causing the seat to unlatch and flip forward, possibly injuring your baby.

There have been 416 reports breaking, resulting in 9 injuries to children.

What should you do?

- Stop using the car seat as a carrier immediately.
- Contact Dorel Juvenile Group (800-880-9435) for a free repair kit.

Embrace by Evenflo

Date of recall: May 10, 2007

These car seats were made before April 8, 2006. The model numbers begin with 317, 320, 397, 398, 540, 548, 549, 550, 556, 597, 598, or 599. You can find the model number and production date information on a white label on the bottom of the carrier and on the top of the convenience base.

Models beginning with “5” are sold with a travel system (with a stroller). The phrase “EvenFlo” is printed on the carrying handle and car seat base. Embrace infant car seat/carriers made on or after April 8th, 2006 are not included in this recall.

The seats were sold from December 2004 through September 2006 for between $70 and $100 alone and $140 to $200 when sold in as part of a travel system.

Reason for the recall:

- When being used as a carrier, the handle can unexpectedly release, causing the seat to rotate forward. An infant could easily fall out.
There have been 679 reports of the handle unexpectedly releasing, resulting in 160 injuries to children. Of those 160, there was one skull fracture, two concussions, as well as numerous cuts, scrapes and bruises.

What should you do?

- Do not use the handle until the repair kit has been installed. It can still be used as a car seat.
- Contact Evenflo (800-490-7497) for a free repair kit to strengthen the handle latch.

Marathon by Britax

Date of recall: October 22, 2007

Britax has announced they are voluntarily recalling about 13,000 Marathon car seats.

The recalled seats were manufactured from May 23, 2006 through July 28, 2006 and include model numbers E9L06, E9W06, and E906. The production date is printed on a white label located on the child’s left-hand side of the seat, near the hand area.

See the picture to the right to find where to look for the production dates.

You may need to lift the cover to see the label. The lot number, KGR 01 A, is printed on the top tether hook. See the picture to the right.

Reason for the recall:

- If the child in the car seat weighs more than 50 lbs, the top tether hook may open and release from the tether anchor in a crash, allowing the child to get hurt.

What should you do?

- Call Britax (800-683-2045) to request a repair kit.
- The seat can be safely used without the kit for children weighing less than 50 lbs.
Discovery by Evenflo

Date of recall: February 1, 2008

Evenflo has announced the recall of its Discovery Infant Car Seat Models 390, 391, 534, and 552. Nearly one million of these car seats were manufactured and sold since April, 2005.

Reason for the recall:

- Lab tests done by the National Highway Traffic Safety Administration and Evenflo showed that the car seat could potentially become separated from its base in a high impact side collision.

What should you do?

- Evenflo is providing a free supplemental dual-hook fastener proven to keep the seat attached to the base.
- Contact Evenflo (800-356-2229) to request this fastener. No shipping is required. Expect it to arrive in 3-4 weeks. Until then, consumers are being encouraged to continue using the car seat.

Safety 1st, Cosco, Eddie Bauer, and Disney Brands by Dorel

Date of recall: December 18, 2009

This particular recall involves the brands of Safety 1st, Cosco, Eddie Bauer and Disney, all manufactured by Dorel Juvenile Group. They were made between January 6th, 2008 through April 6, 2009, and have the model names below. You can locate the model numbers and manufacturing date on the side of the car seat/carrier.

They were sold with Travel Systems. The stroller portion of the Travel Systems are not being recalled.

</tbody>
</table>

The car seats were sold at department and juvenile product stores nationwide from January 2008 through December 2009 for between $120 and $220.

Reason for the recall:

- When used as an infant carrier, the child restraint handle can loosen and come off, creating a fall hazard.
- There have been 77 reports of the child restraint handle fully or partially coming off. This resulted in 3 injuries to infants including bumps, bruises, and a head injury.

What should you do?

- Do not use the handle portion of the carrier until the repair kit has been installed. The car seat can be continued to be used in the car.
- Contact Dorel Juvenile Group (866-762-3316) to receive a free repair kit.
Chaperone Infant Car Seat by Britax

Date of recall: November 4, 2010

Britax has announced the recall of its Chaperone Infant Car Seat Models E9L69N9 (Moonstone), E9L69P2 (Red Mill), E9L69P3 (Savannah), and E9L69P5 (Cowmooflage). All models were manufactured between April 2009 and May 2010. There is a white label on the underside of the car seat with the seat’s serial number, model number and manufacture date.

Reason for the recall:

✶ The harness chest clip could break and pose a hazard for lacerations and possible choking.
  ◦ There have been four reports of the chest clip breaking.
  ◦ Three reports included minor lacerations and scratches to fingers and arms.
  ◦ One report involved an infant putting the clip in its mouth.

What should you do?

✶ Contact Britax immediately for a repair kit that includes a replacement chest clip. Registered owners have been contacted by Britax directly.
✶ Contact Britax at (888-427-4829) or at their web address at www.britax.com.
